Asplundh Continues Safe Route Review in Salisbury

City of Salisbury Dedicated to Ensuring Safety for Fiber to the Home Installation Contractors

Salisbury, NC _August 24, 2009 – The Asplundh Tree Expert Company continues its safe route review process for contractors installing Fiber to the Home products in Salisbury. Asplundh is currently reviewing city streets, utility poles, and vegetation outgrowth to guarantee that the present right of way maintenance offers the maximum safety for fiber product installers. Tunnel trimming may include snipping of branches that pose a potential hazard for fiber service installers during placement of fiber products.

Through August 28, Asplundh will be working within a two-mile radius of the following cross streets:

Long Street and Eleventh Street
Shaver Street and Grady Street

City of Salisbury Fiber to the Home Services Delivery Manager Barry King shares that in many instances, “very little or no trimming to tree branches may be needed. Our objective is to create a very small channel with right-of-way clearing that ensures the safety of our contractors during installation of the fiber product. Necessary work will include clearing out over-growth that inhibits adequate installation. The wellbeing of our contractors is of greatest importance.” King offers that citizens with any questions or concerns should feel free to contact him by calling 704-216-7567.

The City of Salisbury is an equal opportunity employer with over 180 different job classifications and 400 full time positions. For more information regarding the City of Salisbury and its services and departments, please visit us on the web at www.salisburync.gov.
